Percentage: 90.60%

PROJECTS

Spotify Clone Web application Using HTML, CSS, and JavaScript.

- It is a web application project developed using HTML, CSS, and JavaScript.
- The primary goal of this project is to develop a web application that mimics the key features of the popular music streaming service, Spotify.

Netflix Clone Web Design Using HTML & CSS Only

- It is a web design project developed using HTML and CSS.
- The primary goal of this project is to design a static web page that closely resembles the visual appearance and layout of the Netflix website. This project is intended for learning purposes and to showcase HTML and CSS skills.

Twitter UI Clone Using Tailwind CSS

- Utilizing Tailwind CSS, I designed and developed a full-fledged clone of the Twitter user interface, showcasing proficiency in front-end development and UI/UX design principles.
- Implemented responsive design techniques to ensure seamless user experience across various devices and screen sizes.
